THE celebration of the centennial of George Stephenson, the great and first of railroad engineers, is to be made specially impressive in the Tyneside district, Northumberland, in an humble house in which he was born. A chain of locomotives, representing the various stages of the development of that wonderful machine, is to be linked together at the Central station at Newenstle-on-Tyne, and journey thence to the Street house. There is also to be a procession of all the trade societies and public bodies in the Tyneside district, including the Miners Association of Northumberland and Dorham, and a great public demonstration

It is not fair, it is not justwe had almost said it was not honorable-to refuse to investigate, when he has time and again within the past six weeks requested and courted investigation. Mr. Murray's reputation is as dear to him as that of any man in the city, and he should not be allowed to rest a day longer under the shadow of a doubt. The Board should either withdraw the charges, and declare Mr. Murray free of all stain or taint, or else they should

This our contemporary very emphatically declares is false; such an order never was given. The orders really issued by Mr. Dorsey declare had been shipped in and damp state from the West, and that while in transit it became damaged. To escape any losses such hay. Only this and nothing more. He said nothing about "sweated" grain, nothing against the barge lines of the Mississippi river.
